SUMMARY

Computer Science undergraduate with full-stack web development experience in JavaScript, React.js, Node.js, Express.js, NestJS, and PHP. Skilled in RESTful API design, database management, and building dynamic web applications. Gained hands-on experience through a software developer internship and MERN stack training, building projects in e-commerce, sports management, and healthcare. Passionate about backend architecture and building scalable applications.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, PHP, HTML5, CSS3, SQL

Frameworks & Tools: React.js, Express.js, NestJS, Node.js, Tailwind CSS

Databases & Technologies: MongoDB, MySQL, PostgreSQL, XAMPP, RESTful APIs, Git, GitHub

Core Concepts: Object-Oriented Programming (OOP), Data Structures and Algorithms, Full-Stack Architecture

EDUCATION

Bachelor of Science in Computer Science (BSCS) - University of Lahore

Expected June 2027

WORK EXPERIENCE

Software Developer Intern - Hubex Tech

July 2026 - September 2026

- Develop, debug, and maintain web applications using modern JavaScript frameworks.
- Optimize frontend UI components to ensure clean user experience and responsiveness.

MERN Stack Development Trainee - Biafotech Pvt Limited (NAVTTTC / CMIT)

April 2026 - July 2026

- Completed full-stack training in MongoDB, Express.js, React.js, and Node.js.
- Designed modular application components and integrated REST APIs with database backends.

PROJECTS

Sports Management System | NestJS, PostgreSQL, REST API

- Engineered a backend service to manage sports events, teams, and user scheduling.

Drive Vitals Marketing Site | React.js, Express.js, Node.js, MongoDB

- Engineered a dynamic marketing web platform for healthcare and diagnostic metrics using the MERN stack.

MERN Stack Calculator | React.js, Node.js, Express.js, MongoDB

- Developed a calculator app with history logging and state processing via a Node/Express backend.

NestJS To-Do Application | NestJS, TypeScript, REST API

- Built a task management backend service handling task tracking and payload validation.

Honey E-Commerce Platform | PHP, MySQL, XAMPP

- Built an e-commerce platform with authentication, catalog, shopping cart, and dynamic SQL query handling.

Grocery E-Commerce Store | React.js, Tailwind CSS, REST API

- Created a responsive frontend app using React.js and Tailwind CSS integrated with external REST APIs.

CERTIFICATIONS

- MERN Stack Development - Government of Punjab / NAVTTTC
- JavaScript Certification - Udemy
- HTML and CSS Certifications - Udemy

INTERESTS

Mobile App Development (React Native), Backend Architecture, Artificial Intelligence, Computer Vision, Data Analytics
